[Universal Product /Reference vehicle-specific Partition Transfer Kit Instructions](#)

Features

- Features a three piece 1/4" clear polycarbonate window with locking horizontal sliding center section
- Optional screen (sold separately) also available to cover window opening
- Quickest install in the industry
- Requires vehicle-specific Transfer Kit with filler panels for complete installation of partition

Description

The Sliding Window partition is the most popular partition, as it allows full separation between the front and backseat of the vehicle. The sliding window allows an opening for additional air flow or for access to the backseat.
